COMPANY

OLI

BIM

OLI-Sistemas Sanitários S.A., founded in 1954 in Aveiro, is the largest cistern producer in Southern Europe and owns OLI, a global brand of bath solutions, present in 80 countries on five continents.

In the large and modern industrial complex, with a total area of 82 thousand square meters and 389 employees, the entire value chain is controlled - from idea to industrialization, production and commercialization. The factory, recognized for innovation and awarded for efficiency, works 24 hours a day, 7 days a week, and ensures weekly production of 43 700 flushing cisterns and 64 000 mechanisms.

Over the years, OLI has created products that have, on a global scale, changed the daily experience in the bathroom. The WC has become more efficient and environmentally friendly, comfortable and accessible.

Over 20 years ago OLI was responsible for the mass production of the dual flush in flushing cisterns, an innovation now present all over the world and responsible for reducing water consumption by 50%.

Using patented technology and high quality manufacturing standards, OLI is recognized for constantly studying new and better solutions that increase water efficiency and accessibility for people with reduced mobility. From inlet valves, which allow the quick and silent filling of the cistern, to the resistant self-supporting structures that allow the user to adjust the height of the toilet.

Committed to sustainable development, the brand develops versatile solutions for application in new construction, and rehabilitation and renovation projects, with a contemporary design.

OLI believes in a water-efficient bathroom that is comfortable, accessible and safe for all to use. OLI will continue to be defined by innovation.

Since 1993, the company has been part of Silmar Group, headquartered in Italy, which operates in four sectors: heating, aluminium, plumbing and drainage, and fire safety. The group has 2957 employees and in 2017 had an annual turnover of 907 million euros.

RESEARCH

On a daily basis, and in partnership with universities and research centres, OLI's Research and Development Centre works on the development of new ideas and solutions that increase water efficiency and accessibility for people with reduced mobility in the bathroom.

DEVELOPMENT

In partnership with universities and research centres, customers and other business partners OLI's Research and Development Centre works daily on the development of new ideas and solutions that increase water efficiency and the inclusion of people with reduced mobility in the bathroom.

Quality and Certifications

INNOVATION

Innovation defines OLI's DNA. The signature "Inspired by water" manifests OLI's commitment to placing innovation in the service of water preservation, with the overall goal of making the world a better place to live.

In the last five years, OLI has invested 10 million euros in research and innovation. Currently OLI has 41 active patents, and is one of the Portuguese companies with more patents in Europe.

DESIGN

In addition to being sustainable and accessible, OLI solutions are also characterized by their contemporary design with simple and refined lines.

AWARDS

OLI

BIM

MILLENNIUM HORIZONTES AWARD – INOVATION 2017

Big company category

THE GREEN PROJECT AWARD 2016

Promoting water saving, received an honorable mention in the “Product or Service” category

GOOD DESIGN AWARD 2016

The award-winning solution, Glassy, is a self-sustainable control plate for in-wall flush cisterns with OLI’s Hydroboost technology.

ARCHIPRODUCTS DESIGN AWARDS 2016

With the “Trumpet” control plate by Siza Vieira.

“I am very pleased with the prestigious “Best of Category 2016” award for the Trumpet control plate. The quality achieved is due to the competent and committed contribution of the technicians at OLI. It was a pleasure to evolve the design of the control plate with them. Álvaro Siza”

Álvaro Siza

BATHROOM, ACCESSORIES AND EQUIPMENT CATEGORY OF THE 2015

Self-sustainable Hydroboost system, a technology that creates its own energy, making use of the movement of water.

BATHROOMS, ACCESSORIES AND EQUIPMENT CATEGORY OF THE 2015

Whose main goal is to “highlight the importance of innovation in the building sector”.

CONSTRUCTION INNOVATION AWARD 2014

Easy Move is a cistern with a frame that allows adjusting the height of the toilet. Other versions compliant with: the user’s needs.

MARKETS

OLI's commercial activities extend to all continents with a presence in over 70 international markets. This extensive coverage reflects the ability of OLI to adapt the characteristics of its products to different installation practices and uses and above all to meet the different standard requirements, that often differ from one country to another.

These are some of the most important international markets where OLI is well known and appreciated: Portugal, France, Italy, Spain, Germany, Belgium, Holland, Austria, Finland, Denmark, Sweden, Czech Republic, Poland, Romania, Russia, Morocco, Egypt, Tunisia, Algeria, Senegal, Cote d'Ivoire, Saudi Arabia, Jordan, The United States of America, Brazil, Mexico and Australia.

DELAYED INLET VALVE SYSTEM

Saving water in our everyday lives is now, more than ever, crucially important. In order to help people decrease their water consumption, and in turn decrease their water bill, OLI developed the Azor Plus inlet valve, a water-saving solution that equips the latest models of OLI cisterns. In this catalogue you will find several products equipped with the Azor Plus inlet valve.

The Azor Plus inlet valve can save up to 9 litres of water per day, which corresponds to a 12% reduction in your water bill*. The decreased consumption of water is due to the delayed refilling of water in the cistern, therefore avoiding water waste during flushing.

Thus, water begins to fill the cistern only after the flush valve is closed and all water flushed is efficiently used for cleaning the toilet. This inlet valve is not only ecological, but also quiet, and, therefore, certified by the NF standard, acoustic class 1. It is a versatile product with reduced dimensions, counter pressure closing system, quick filling and effective at any network pressure.

*when comparing average use in a single-family dwelling of 4 people.

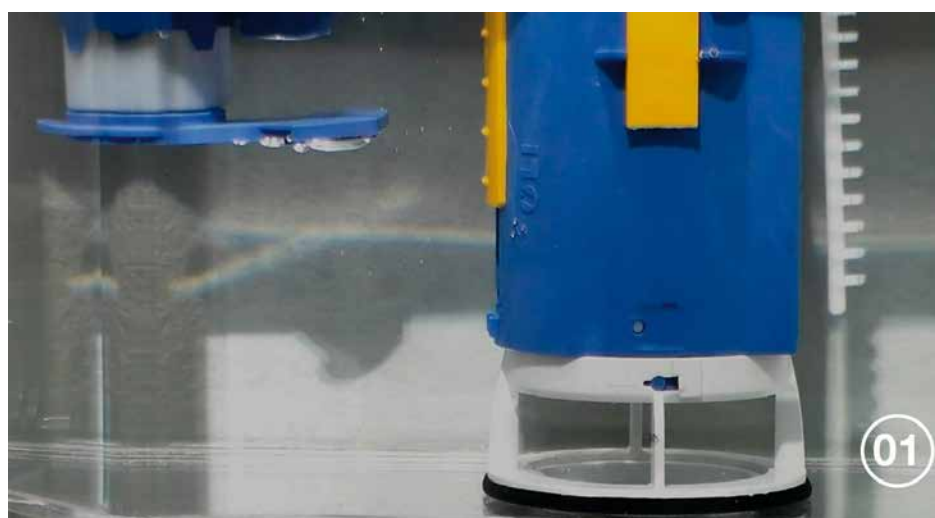

SAVES UP TO **9L**
OF WATER PER DAY

01

While the cistern is emptied,
the inlet valve remains
closed.

02

02
Once the water is flushed,
the outlet valve closes and
the delaying system makes
the inlet valve open to fill the
tank.

BUILDING INFORMATION MODELING

Building Information Modeling (BIM)

OLI is committed to being at the forefront of development in the construction sector. BIM is the new standard of design and construction. BIM facilitates the transfer of information between stakeholders and enables integrated management throughout the product life cycle.

With this methodology, OLI aims to boost the efficiency and creativity of construction projects through cooperative work with architects, engineers, contractors and owners, as well as reinforce its commitment to continuous innovation and the creation of a bathroom that doesn't waste water, is safe and accessible for all.

OLI will continue to progressively expand their library and offer customers a wide range of Sanitary System solutions. Many of OLI's products are available as BIM objects in Graphisoft Archicad®, Autodesk Revit® and SketchUp®. For more information or to download OLI BIM files:

www.oli-world.com

NO TOUCH TECHNOLOGY

Hydroboost

- It uses the energy of water in motion;
- It generates and stores power from the water that fills the toilet tank;
- Power is used to activate the flush;
- There is no need to connect to the power grid or to replace batteries;
- Self-sustainable;
- Self-sufficient sensor activation system;
- Multiple colours available;
- Suitable for intensive use.

AC POWER-MAINS

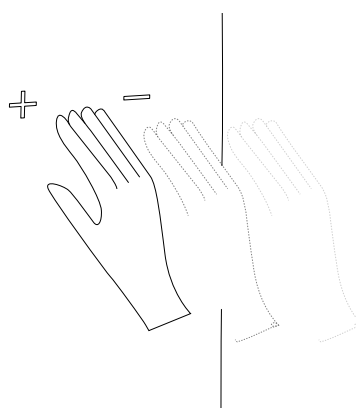

- Innovative concept with capacitive sensors;
- Easy installation;
- Plug and Play.

**Control
Plates**

**Sanitary
Module**

OLIpure®

- **Universal:**
Compatible with existing
liquid disinfectants WC on the
market.
- **Long lasting:**
Storage capacity of 450ml.

OLI

OLIPure is a self-contained system, placed inside the cistern, where the detergent is stored. On each flush the disinfectant is dispensed into the toilet.

OLIPure creates a fresh atmosphere and provides an immediate feeling of comfort and cleanliness, without any effort.

SPECIAL PRODUCTS

SANITARY MODULE

QR is a sanitary module that adapts to many locations, designed for greater space saving in any bathroom. With reduced dimensions and incorporated high end technology, the QR sanitary module is the best option for a quick renovation of bathrooms and also for new sanitary installations.

EASY MOVE

Easy Move is the complete package. It offers a solution that is both aesthetically pleasing and highly functional that allows the user to vary the height of a toilet using a remote control.

HAPPY AIR

A fresh solution for air renewal in rooms without windows. High power extractor allows foul odours to be extracted directly from the WC through the flush pipe and condensation to be extracted through an elegant and discreet plate.

QR-INOX

Sanitary Module

QR-INOX is a Sanitary module that adapts to many locations, designed for a greater space saving in any bathroom. With reduced dimensions and incorporated high technology, the QR-INOX sanitary module is the best option for a quick renovation of bathrooms and new sanitary installations.

A universal and versatile solution for a quick and easy renovation of your bathroom.

NO TOUCH

With the QR-INOX NO TOUCH, there is no need to touch the module to activate the flush. The tempered glass is equipped with capacitive sensors and detects the approach of the human body at approximately 20 mm.

You can choose between the half flush and the complete flush by simply approaching your hand to the corresponding light symbol. With the QR-INOX NO TOUCH, hygiene and convenience are taken to a new level, by adopting a clean and sustainable technology.

Hydroboost

AC POWER-MAINS

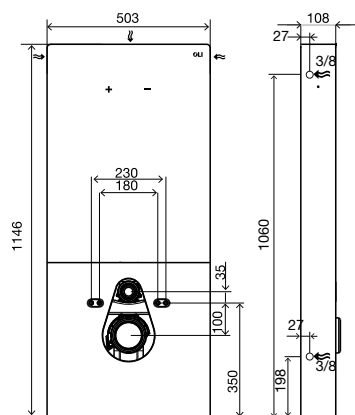

BUTTON

The QR-INOX BUTTON comes with a stainless steel tilt selector button in a matt finish for activating the flush. The button's rounded shape provides the QR-INOX BUTTON with nobility and distinctiveness.

Easy Move is the complete package. It offers a solution that is both aesthetically pleasing and highly functional that allows the user to vary the height of a toilet using a remote control. When simple movements, such as getting up from sitting on the toilet, become a problem, Easy Move intervenes by simplifying the lives of children, the elderly and people with reduced mobility. Easy Move is available with an optional handles kit for people with reduced mobility.

The Easy Move frame is compatible with all WC pan models on the market and guarantees modifications in height of up to 150mm, starting with a minimum height of 400mm and reaching a maximum height of 550mm; the structure has a depth of 200mm including the cistern and the motor.

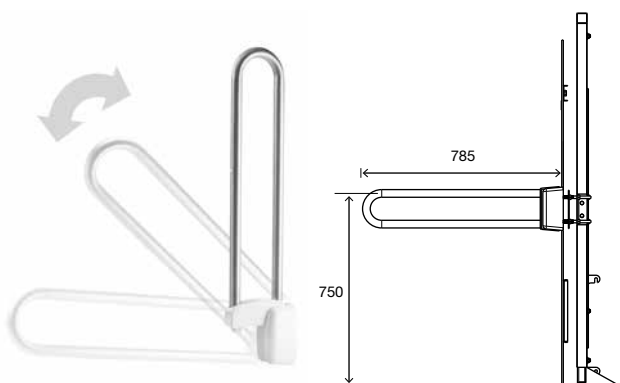

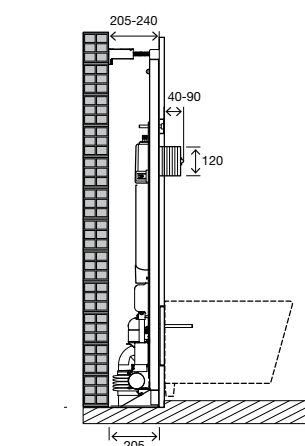

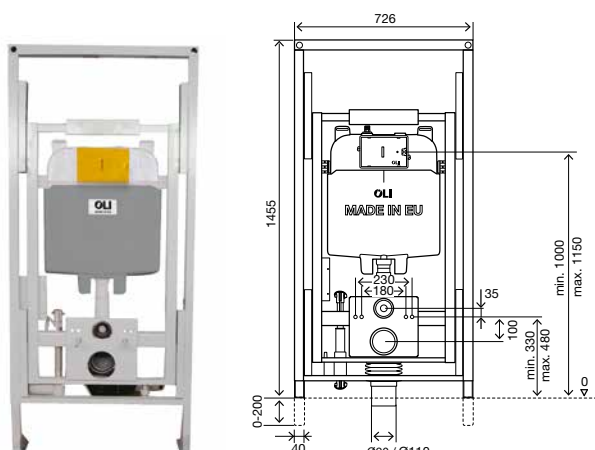

The engine is extremely powerful with a thrust of more than 600kg, and offers maximum reliability and silence: when operating the noise of the motor is practically inaudible. The Easy Move structure also incorporates a flexible flush pipe and possesses a movement speed of 28mm/s thus allowing rapid alteration of the WC pan height.

Easy Move is available in both black or white tempered glass.

2014 innovation award about technologies to support building rehabilitation (Portugal)

HAPPY AIR

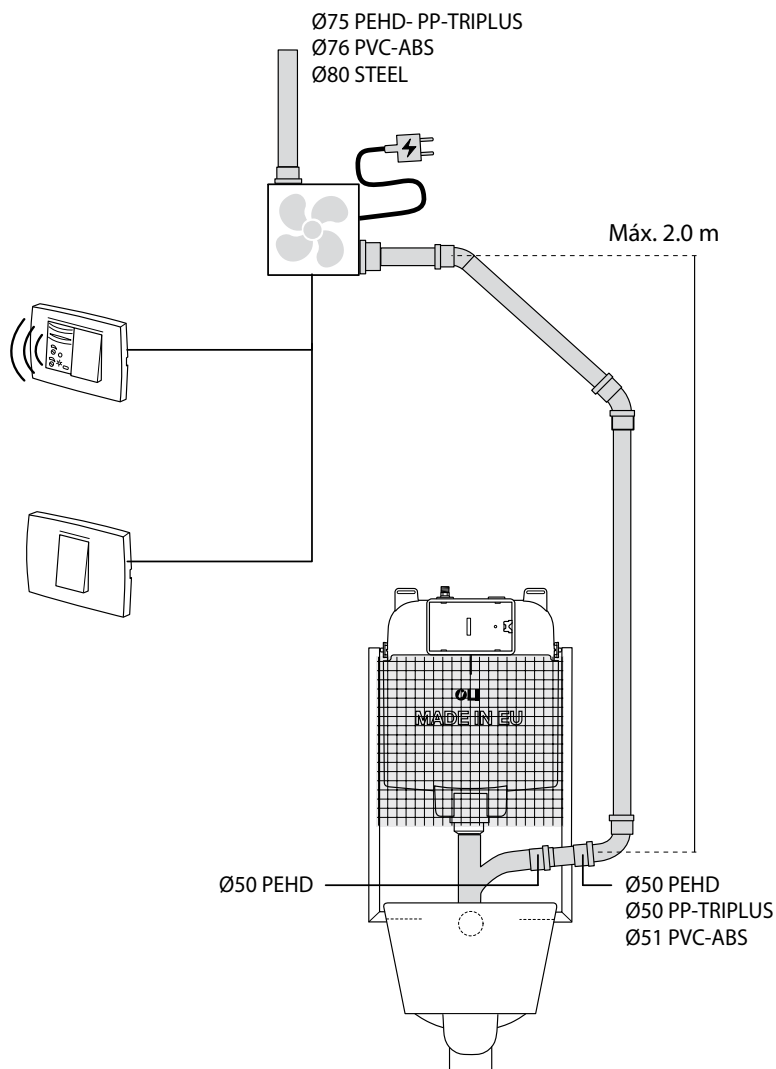

System

- Dual function on a single aspiration fan;
- It can be installed on the wall or on the ceiling;
- Reduced noise <35 dB(A);
- High aspiration capacity 100 m³/h (70% odours, 30% condensation);
- Power Supply: 220V (50Hz); Insulation: IP35;
- The extractor fan operates at 230 V/50 Hz or 110V/50 Hz; Activated by switch or sensor;
- Five minute delayed switch-off;
- Anti-back flow valve;
- Paintable cover panel;
- Compatible with OLI74 Plus Happy Air and all its control plates (see compatible control plates Page 90);
- Global warranty of 10 years and 2 years on the electronic components.

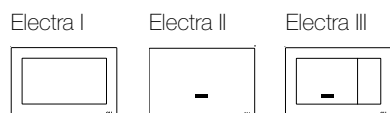

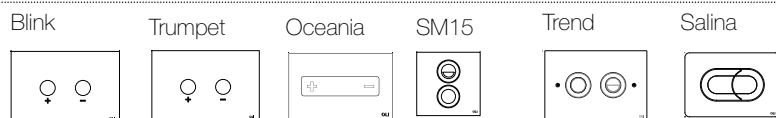

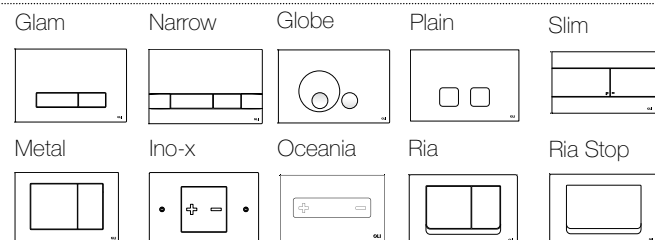

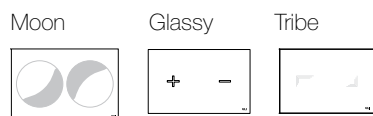

Happy Air system Includes:

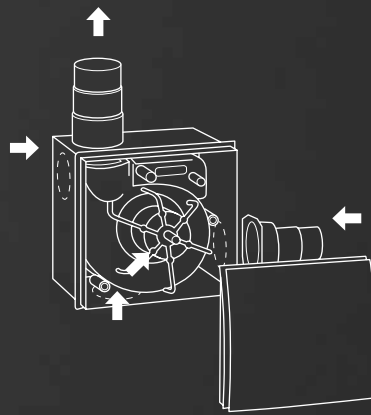

- Inner air filter;
- Fixing material;
- Electrical fan;
- Fan housing;
- Covering plate.

Compatibility

Wide range of control plates

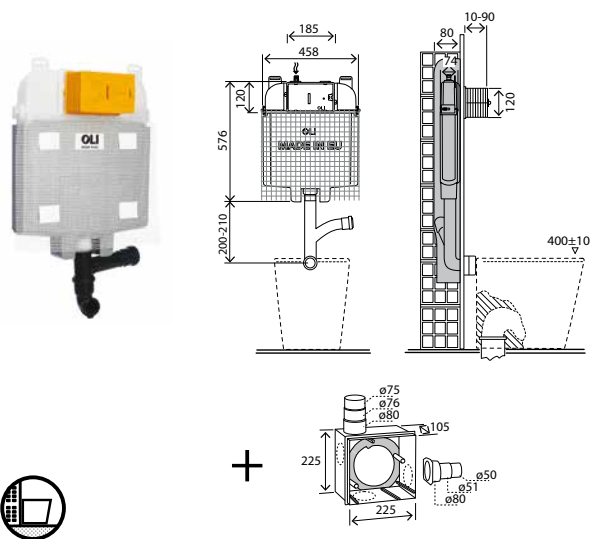

A fresh solution for air renewal in rooms without windows. High power extractor allows foul odours to be extracted directly from the WC through the flush pipe and condensation to be extracted through an elegant and discreet plate. In combination with the OLI74 Plus flush cistern, the Happy Air system meets the strictest European standards. Installation of Happy Air is extremely simple because it is connected directly to the OLI74 Plus flush cistern and there are no restrictions in its positioning.

IN-WALL FLUSH CISTERNS

- Silent

All OLI in-wall cisterns are equipped with silent NF class 1 certified inlet valves. Providing fast filling with minimal noise.

- Space reduction and greater hygiene

The use of in-wall cisterns for wall-hung toilets (tested for a 400kg load) contribute to a faster and more effective cleaning of the bathroom and remove architectural barriers caused by traditional floor standing toilets.

- Versatility

OLI offers a wide range of in-wall cisterns, with mechanical, pneumatic, electronic, or no-touch technology actuation.

- Easy water grid connection

Connecting to the water grid is simple and fast, without the need for tools or connection accessories. The shut off valve is located inside the cistern and opening and closing the valve can be easily done without any tools.

- Easy maintenance

Via the control plate the interior of the in-wall cisterns, can be rapidly accessed and all components can be easily removed for maintenance.

SANITARBLOCK

The Sanitarblock installation system can be used in drywall applications as well as solid wall applications. The main advantage of the system is the ease and speed of safely installing a cistern with a **wall-hung toilet**. The Sanitarblock system is equipped with a Fast Fit system for fixing the frame to the load bearing walls. In compliance with French Standard NF XP-D12 208 (400 kg).

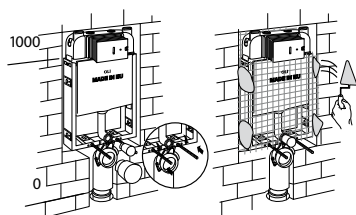

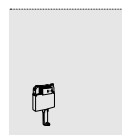

FREE STANDING SANITARBLOCK

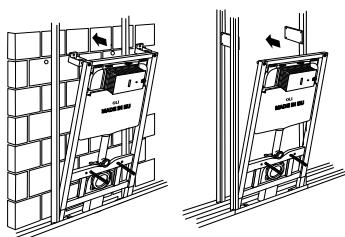

The Sanitarblock free-standing installation system is used in drywall applications with a **wall-hung toilet**. The main advantage of the system is the ease and speed of safely installing a concealed cistern with a wallhung toilet without the need of any type of wall. The feet of the Sanitarblock Free-standing system are designed so that the structure offers good resistance when only secured to the floor; load resistance is guaranteed in compliance with the French Standard NF XPD12 208 (400 kg).

CONTROL PLATES

The wide range of OLI control plates are characterized by their versatility and durability. Designed with cutting edge technology they are suitable for all bathrooms, whether they be public bathrooms or private bathrooms.

OLI has the perfect control plate for any situation. From infrared sensors that allow flushing without having to touch the control plate to models that are highly resistant and vandal proof for public bathrooms.

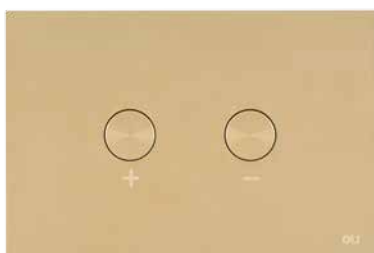

NO-TOUCH

- Innovative concept with capacitive sensors;
- Compatible with Hydroboost or AC system.

MECHANICAL

- Dual flush system;
- High range of control plates;
- Mechanical activation by pull or push.

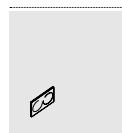

PNEUMATIC

- Dual flush system;
- Soft Activation;
- Pneumatic kit available.

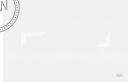

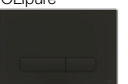

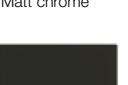

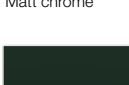

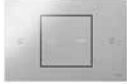

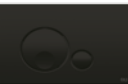

FOOT CONTROL

- Ideal solution for users with reduced mobility;
- Floor and wall foot control plate.

878981 ● MOON Black

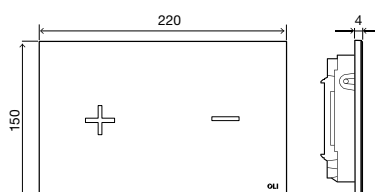

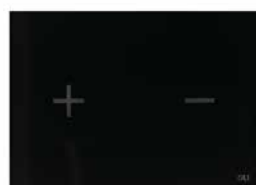

No-touch activation

The use of capacitive sensors enabled OLI to develop the concept around a one-piece ceramic plate with innovative formal and tactile features that ensure superior hygiene levels and ergonomics.

Simple and intuitive

The simple and elegant design of the Moon plate combines high technology with tradition, resulting in a smooth and comfortable interface for the user, whose elegance of shapes highlights the dual flush and favours the half flush.

GLASSY

- No-touch activation through capacitive sensors with led signs, multiple colours available;

Buttons

Elegant in design with two buttons for the dual flush system which perfectly characterize the pistons of a trumpet (the button with the “+” symbol for the full flush and the button with the “-” symbol for the half flush).

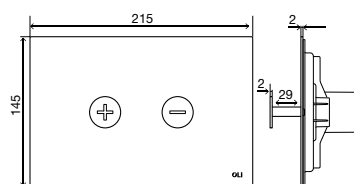

"I am very pleased with the prestigious "Best of Category 2016" award for the Trumpet control plate. The quality achieved is due to the competent and committed contribution of the technicians at OLI. It was a pleasure to evolve the design of the control plate with them.

Álvaro Siza "

878784 TRUMPET Bronze

Siza Vieira - one of the most prestigious and awarded Portuguese architects, with a Pritzker Prize and the Golden Lion for Lifetime Achievement, to name a few - designed a true masterpiece, inspired in an instrument played by great maestros: the trumpet. OLI is proud to present the "Trumpet", the perfect balance between a truly unique design and exceptional music.

SIZA VIEIRA

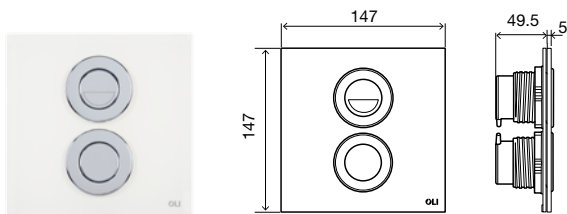

Álvaro Siza Vieira is a world-renowned architect who has collected several international awards, Pritzker Prize in 1992; The Wolf Prize of Arts in 2001; the Golden Lion for Lifetime Achievement in 2012; the Fritz Hoger award in 2014, just to name a few.

The Trumpet control plate was designed by Álvaro Siza Vieira and is the perfect combination of elegance and harmony, both characteristics of a trumpet.

In 2016, the "Trumpet" was selected "Best of Category" for the "Archiproducts Design Awards" one of the most prestigious awards of Architecture and Design worldwide.

SM15

- Designed by Architect Souto de Moura;
- Dual flush;
- Pneumatic actuation;
- Actuation force <20N;
- Installation on the surface wall with 150mm x150mm tiles;
- White tempered glass material;
- 2 year warranty.

CÓD	DESCRIPTION
022238	○ SM15 White tempered glass

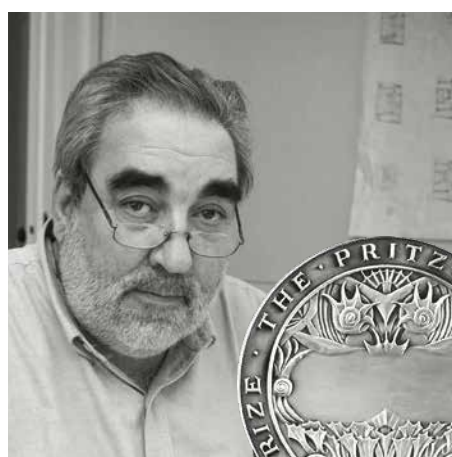

The support and inspection plate has the necessary dimensions to apply the control plate and two Portuguese tiles in the extremities, in order to ensure access to the in-wall cistern for maintenance.

Compatibility

Matching urinal control plate also available.
(see page 113 for more information)

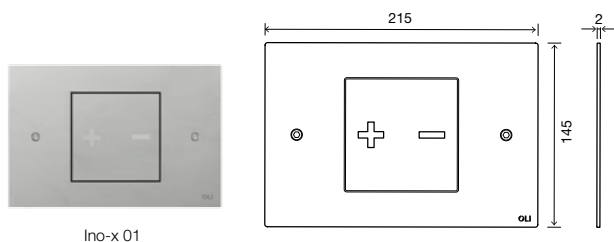

EDUARDO SOUTO DE MOURA

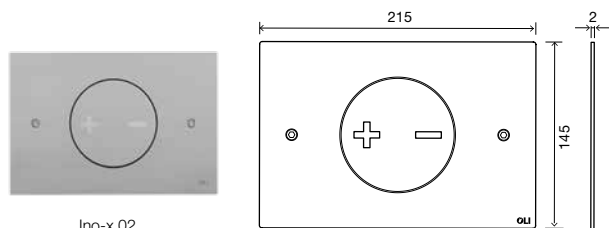

Souto de Moura is a renowned Portuguese architect who has been presented with various international awards, such as, the Gold Medal of Heinrich Tessenow Foundation in 2001; the Pritzker Award in 2011; the Wolf Prize of Arts in 2013; just to name a few. In 2001, in collaboration with OLI, Souto de Moura developed the SM15 for the new Pousada of Portugal in Covilhã.

ROMANO ADOLINI

The Ino-x control plate collection was designed by Romano Adolini, an Italian architect and designer who is an influential figure in bathroom design.

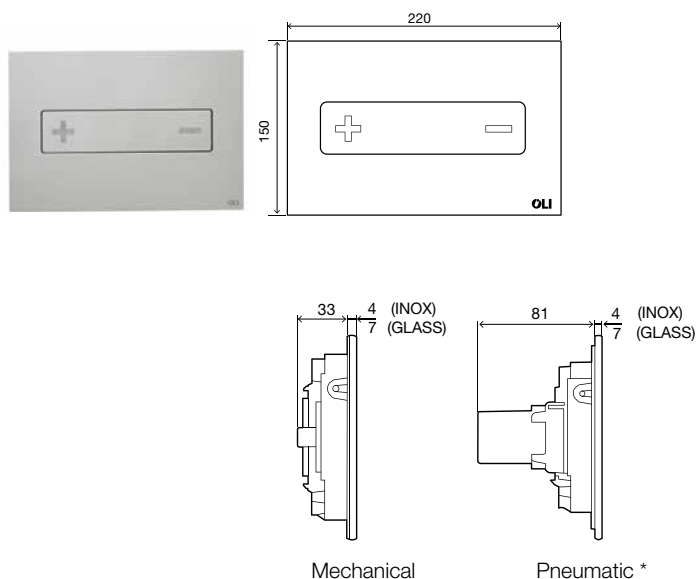

The Ino-x collection is simple, elegant and with a strong visual impact: "A simple sheet of steel that is only 2mm thick cut with a precise laser".

Creating your own masterpiece

The stainless steel frame elegantly outlines the Oceania MIA button. Choose the material of your choice (wood, marble, ceramic, etc.) and using the supplied tools, personalize your own control plate.

640581 ○ RIA White

640584 ● RIA Polished chrome

640586 ● RIA Matt chrome

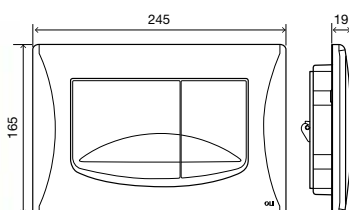

640591 ○ RIA White bacterial proof

010234 ○ RIA stop White

010244 ● RIA stop Polished chrome

- Dual flush or single flush;
- Mechanical actuation;
- Actuation force < 20 N;
- ABS control plate: high resistance to scratches;
- Anti-bacterial finishing available;
- 2 year warranty.

RIVER

CÓD DESCRIPTION

638501 ○ RIVER White

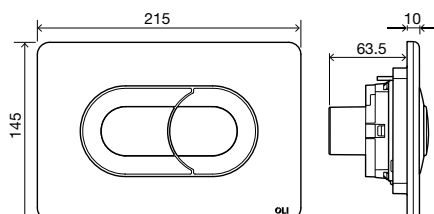

638504 ● RIVER Polished chrome

638506 ● RIVER Matt chrome

638508 ● RIVER Gold plated

- Dual flush;
- Mechanical actuation;
- Actuation force < 20 N;
- ABS control plate: high resistance to scratches;
- 2 year warranty.

SALINA

CÓD DESCRIPTION

640081 ○ SALINA White

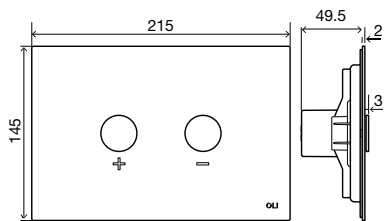

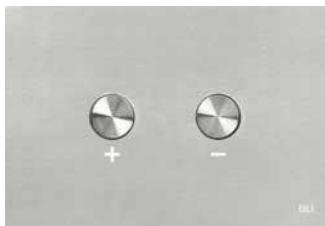

640084 ● SALINA Polished chrome

640086 ● SALINA Matt chrome

640097 ● SALINA Black soft-touch - Polished chrome button

- Dual flush;
- Pneumatic actuation;
- Actuation force < 20 N;
- ABS control plate: high resistance to scratches;
- Soft-touch (ST) finishing available and possible finishing combinations;
- 2 year warranty.

BLINK

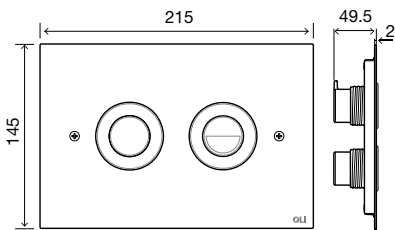

BLINK

- Dual flush;
- Pneumatic actuation;
- Actuation force <20N;
- 2mm thick;
- Stainless steel material;
- 2 years warranty.

CÓD	DESCRIPTION
154963	BLINK Polished chrome
093399	BLINK Brushed
216621	BLINK White
878489	BLINK Black

878782	BLINK Bronze

TREND

- Dual flush;
- Pneumatic actuation;
- Actuation force < 20 N;
- 2mm thick;
- Vandal resistant;
- Stainless steel material;
- 2 year warranty.

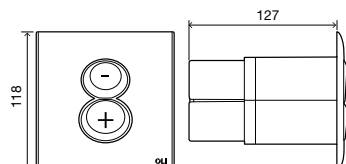

CÓD	DESCRIPTION
656504	TREND Polished chrome
656506	TREND Matt chrome

Matching urinal control plate also available.
(see page 112 for more information)

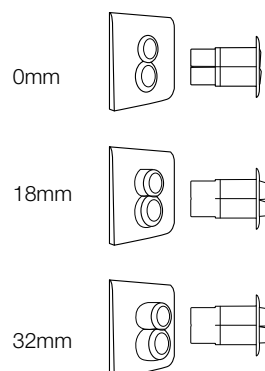

EASY DUAL

**COMPLIANT WITH SAFETY REGULATIONS AGAINST FIRE
AND PANIC HAZARDS IN PUBLIC BUILDINGS (ERP) -
ARTICLE CO 31**

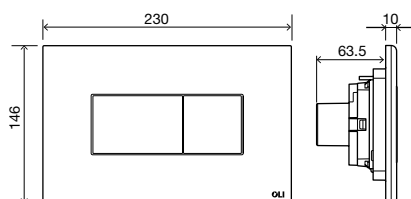

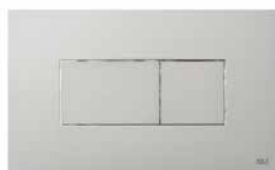

- Dual flush;
- Pneumatic actuation;
- Compatible with all pneumatic in-wall cisterns;
- ABS control plate;
- Vandal resistant;
- Adjustable buttons: 0mm, 18mm or 32mm
- 2 year warranty.

Not meant to be used in the opening of the in-wall cistern. An inspection plate (code 207892) should be applied to ensure access to the cistern. Pre-installation necessary.

CÓD	DESCRIPTION
011640	○ EASY DUAL white
011642	● EASY DUAL Chrome

KARISMA

- Dual flush;
- Pneumatic actuation;
- Actuation force < 20 N;
- ABS control plate: high resistance to scratches;
- Soft-touch (ST) finishing available and possible finishing combinations;
- 2 year warranty.

641015	● KARISMA Black soft-touch

Installation - minimum front wall thickness:
OLI120 plus: 20mm; OLI74 Plus: 25mm; Expert PLUS- Front
Application: 0mm ;Expert PLUS- Top Application: 30mm; Quadra:
15mm

COMMERCIAL

The wide range of OLI control plates are characterized by their versatility and durability. Designed with cutting edge technology they are suitable for all bathrooms, whether they be public bathrooms or private bathrooms.

OLI has the perfect control plate for any situation. From infrared sensors that allow flushing without having to touch the control plate to models that are highly resistant for public bathrooms.

Vandal resistant

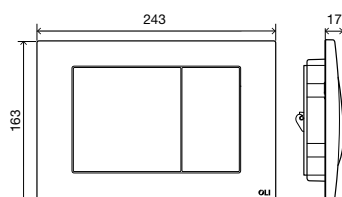

OLI control plates are ideal for commercial applications.

Hygiene 100%

Equipped with an infrared sensor, Electra II and Electra III control plates flush without touching the control plate. 100% Hygienic.

METAL

- Dual flush;
- Mechanical actuation;
- Actuation force < 20 N;
- Vandal resistant;
- Zamac material;
- 2 year warranty.

--------	-------------------------

ELECTRA III

- Dual flush (<60s half flush; >60s full flush);
- Infrared sensor or mechanical actuation;
- Actuation force < 20 N;
- Compatible with OLI120 Plus and OLI74 Plus electronic version;
- Electric power connection with pre-installation needed (adapter 230v/120v not included);
- Vandal resistant;
- Polished chrome Zamac material;
- 2 year warranty.

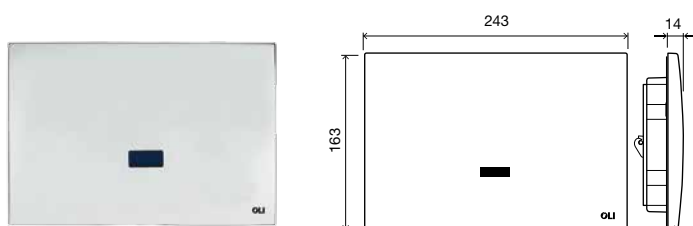

CÓD DESCRIPTION

079206 ● ELECTRA III Polished chrome zamac

Matching urinal control plate also available.
(see page 112 for more information)

ELECTRA II

- Dual flush (<60s half flush; >60s full flush);
- Infrared sensor actuation;
- Compatible with OLI120 Plus and OLI74 Plus electronic version;
- Electric power connection with pre-installation needed (adapter 230v/120v not included);
- Vandal resistant;
- Polished chrome Zamac material;
- 2 year warranty.

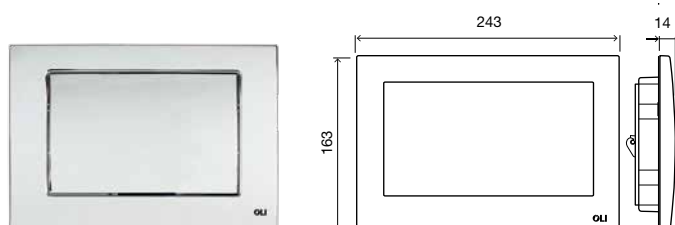

CÓD DESCRIPTION

079205 ● ELECTRA II Polished chrome zamac

Matching urinal control plate also available.
(see page 112 for more information)

ELECTRA I

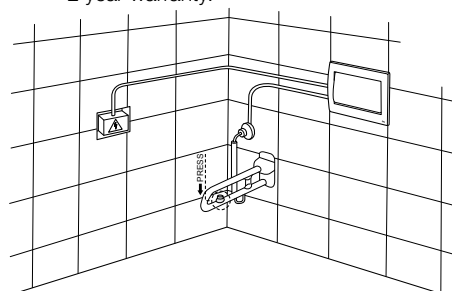

- Single flush;
- Activation by switch (not included) or mechanical;
- Actuation force < 20 N;
- Compatible with OLI120 Plus and OLI74 Plus electronic version;
- Electric power connection with pre-installation needed (adapter 230v/120v not included);
- Connecting cable to the switch (4m) included;
- Vandal resistant;
- Polished chrome Zamac material;
- 2 year warranty.

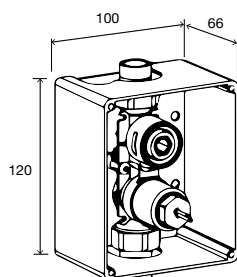

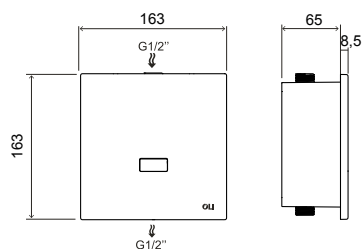

CÓD DESCRIPTION

eAQUA URINAL

Urinal concealed pre-installation

CÓD DESCRIPTION

879120 eAQUA URINAL Polished chrome AC

879119 eAQUA URINAL Polished chrome BATT

879123 Urinal concealed pre-installation

- Brushed stainless-steel front plate;
- Double infrared sensors (with automatic setting feature);
- Dynamic sensor: constantly adjusts the optimum range;
- Temporary-off (cleaning) and short-on (manual flush) activate with touch;
- Flush time and sensor sensitivity adjustable with touch;
- 24- or 48-hour hygienic flush and pre-flush activate with touch;
- Compatible with ECO and URINAL Sanitarblock the fluxometer has to be installed before closing the wall;
- Vandal resistant;
- 2 year warranty.

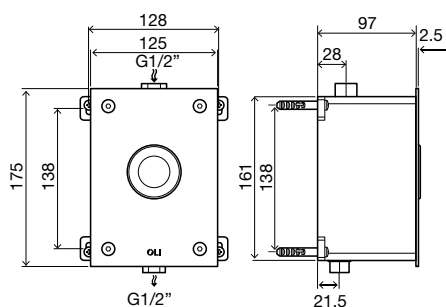

Urinal concealed pre installation

- Operating pressure: 0,3 - 10 bar;
- Flow rate: ca. 20 l/min. (3 bar);
- 6V Lithium CRP 2 (standard: life time up to 4 years) / mains power supply 230V/6V;
- Standards: DIN EN 200; CE.

Matching ELECTRA control plate also available.
(see page 111 for more information)

TREND URINAL

CÓD DESCRIPTION

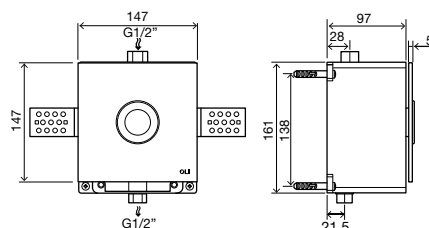

031752 TREND URINAL Polished chrome zamac

- Single flush;
- Mechanically actuated fluxometer;
- Adjustable flush time;
- Adjustable flow;
- Operating pressure ≥ 3 bar;
- G 1/2 water connections;
- 2,5mm thick;
- Vandal resistant;
- Polished chrome Zamac material;
- Compatible with ECO and URINAL Sanitarblock the fluxometer has to be installed before closing the wall;
- 2 year warranty.

Matching TREND control plate also available.
(see page 106 for more information)

SM15 URINAL

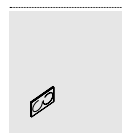

- Single flush;
- Mechanically actuated fluxometer;
- Adjustable flush time;
- Adjustable flow;
- Operating pressure $\geq 3\text{bar}$;
- G $\frac{1}{2}$ water connections;
- 5mm thick;
- White tempered glass material;
- Compatible with ECO and URINAL Sanitarblock the fluxometer has to be installed before closing the wall;
- 2 year warranty.

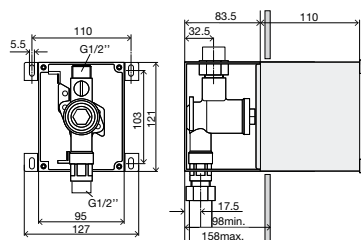

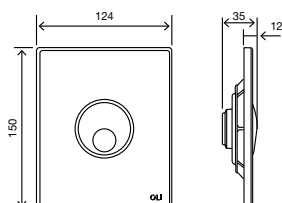

CÓD DESCRIPTION

034265 ○ SM15 URINAL White tempered glass

Matching SM15 control plate also available.
(see page 98 for more information)

GLOBE URINAL

- Single flush;
- Mechanically actuated;
- Multiple colours available;
- ABS control plate: high resistance to scratches;
- Vandal resistance;
- Compatible with ECO and URINAL Sanitarblock the fluxometer has to be installed before closing the wall;
- 2 years warranty.

Urinal concealed pre installation

- Protection cover;
- Pre-assembled water path with isolating valve;
- Sealing plug;
- Adjustable flow;
- Flow pressure: 0,8 - 5 bar;
- Flush volume: 0,3 l/s;
- G $\frac{1}{2}$ water connection.

INSPECTION PLATE

- Inspection plate for pneumatic versions: OLI74 PLUS, EXPERT PLUS, QUADRA PLUS and OLI120 PLUS;
- Vandal resistant;
- Stainless steel material.

CÓD	DESCRIPTION
207892	Inspection plate Chrome
207893	Inspection plate Brushed

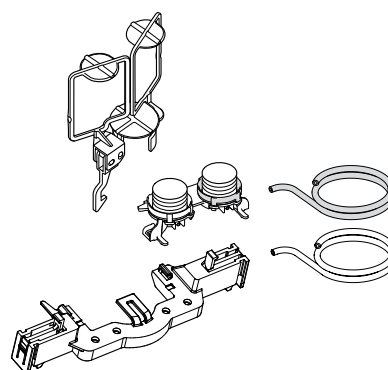

FLOOR SUPPORT SYSTEM WITH LATERAL FIXATION FOR SIMFLEX FRAMES

- Compatible with OLI Simflex frames;
- Fixing material included.

CÓD	DESCRIPTION
620001	Floor support system with lateral fixation for Simflex frames

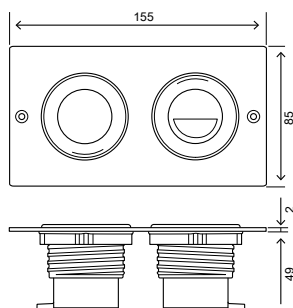

PNEUMATIC CONVERSION KIT FOR QUADRA

- 2 pneumatic pipes with 2,5m;
- Outlet valve pneumatic anchors;
- Pneumatic bellows.

CÓD	DESCRIPTION
101773	Pneumatic Conversion Kit for QUADRA

MINI TREND *

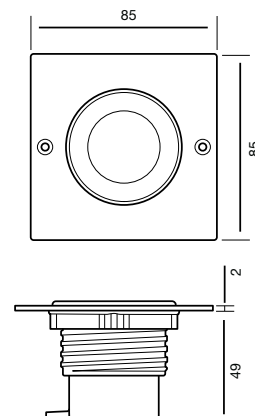

- Dual flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall cisterns;
- For light wall installations only;
- In-wall box for brickwall installation available upon request;
- Vandal resistant;
- Polished chrome Stainless steel material;
- 2 year warranty.

Included

- Pneumatic flexible hose L.2500 mm;
- Corrugated pipe L.2500 mm.

CÓD	DESCRIPTION
605294	MINI TREND

MONO TREND *

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- For light wall installations only;
- In-wall box for brickwall installation available upon request;
- Vandal resistant;
- Polished chrome Stainless steel material;
- 2 year warranty.

Included

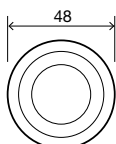

- Pneumatic flexible hose L.2500 mm;
- Corrugated pipe L.2500 mm.

CÓD	DESCRIPTION
605254	MONO TREND

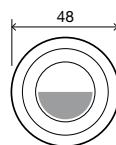

SPHERA *

Complete flush - Sphera +

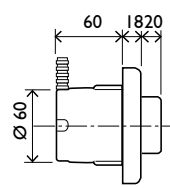

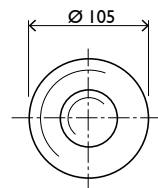

Half flush - Sphera -

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- For light wall installations only;
- Polished chrome ABS material;
- 2 year warranty.

CÓD	DESCRIPTION
605264	Pneumatic Actuators SPHERA +
605274	Pneumatic Actuators SPHERA -

PNEUMATIC ACTUATOR *

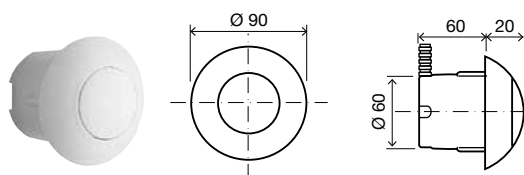

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- White ABS material;
- 2 year warranty.

Included

- Fixing material
- Pneumatic flexible hose L. 2500 mm
- Protection pipe L. 2500 mm
- In-wall box

CÓD	DESCRIPTION
718063	In-wall Pneumatic actuator hand operated White

PNEUMATIC ACTUATOR *

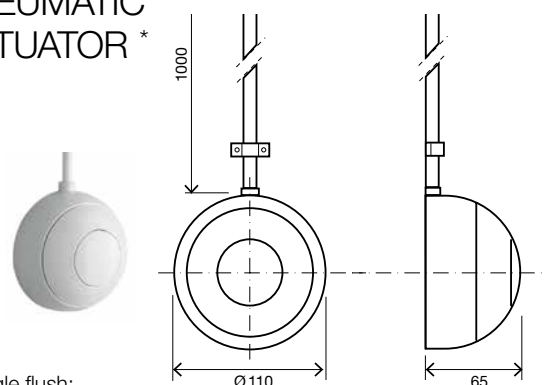

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- ABS material;
- 2 year warranty.

Included

- Fixing material;
- Pneumatic flexible hose L. 2500 mm;
- Protection pipe L. 2500 mm;
- In-wall box.

CÓD	DESCRIPTION
605001	○ In-wall Pneumatic actuator hand operated White
605004	● In-wall Pneumatic actuator hand operated Polished chrome

PNEUMATIC ACTUATOR *

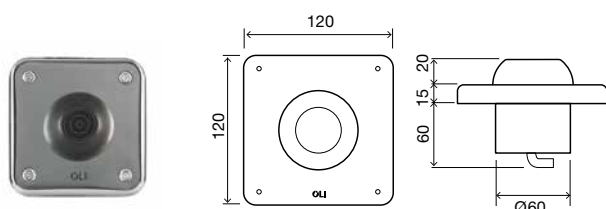

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- ABS material;
- 2 year warranty.

Included

- Fixing material;
- Pneumatic flexible hose L. 2500 mm;
- Aesthetic covering pipe L. 1000 mm.

CÓD	DESCRIPTION
605101	○ Pneumatic actuator hand operated White
605104	● Pneumatic Actuators hand operated Polished chrome

FOOT CONTROL FLOOR *

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- Floor installation;
- Anti-sliding push button;
- Vandal resistant;
- Stainless steel material;
- 2 year warranty.

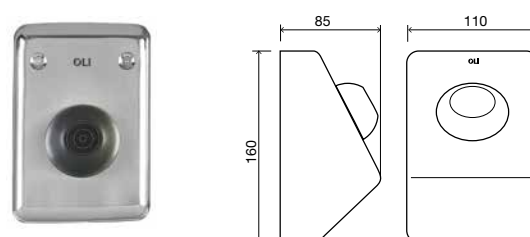

Included

- Fixing material;
- Pneumatic flexible hose L. 2500 mm;
- Protection pipe L. 2500 mm.

CÓD	DESCRIPTION
605201	● Pneumatic actuator foot operated floor mounted

FOOT CONTROL WALL *

- Single flush;
- Pneumatic actuation;
- Compatible with all OLI pneumatic in-wall and exposed cisterns;
- Wall installation;
- Anti-sliding push button;
- Vandal resistant;
- Stainless steel material;
- 2 year warranty.

Included

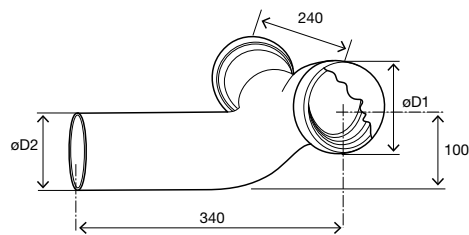

- Fixing material;
- Pneumatic flexible hose L. 2500 mm;
- Protection pipe L. 2500 mm.

CÓD	DESCRIPTION
605301	● Pneumatic actuator foot operated wall mounted

* Not meant to be used in the opening of the in-wall cistern. An inspection plate (code 207892) should be applied to ensure access to the cistern. Pre-installation necessary.

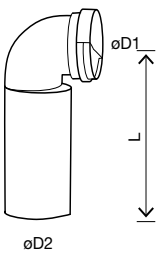

DOUBLE OUTLET BEND

- Double outlet bend for wall-hung WC pans horizontal installation.

602301	Connecting pipe L - 500, D1 - Ø90, D2 - Ø40, D3 - Ø40 White

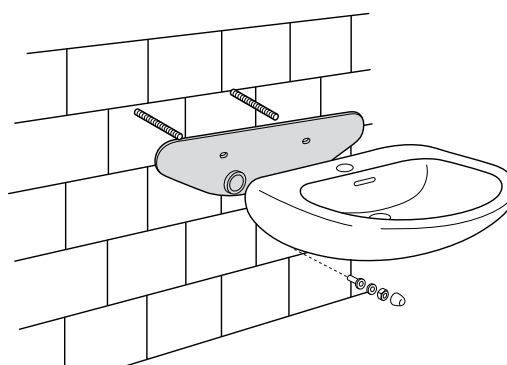

ACOUSTIC INSULATION FOR WALL-HUNG PAN AND BIDET

- Acoustic insulation in expanded polyethylene;
- Avoids direct contact between the sanitaryware and the tile.

CÓD	DESCRIPTION
620071	Acoustic insulation for wall-hung pan and bidet

ACOUSTIC INSULATION FOR WALL-HUNG WASHBASIN

- Acoustic insulation in expanded polyethylene;
- Avoids direct contact between the sanitaryware and the tile.

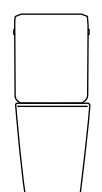

CÓD	DESCRIPTION
620072	Acoustic insulation for wall-hung washbasin

EXPOSED FLUSH CISTERNS

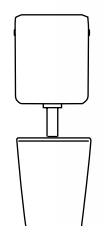

These flush cisterns are made with bright thermoplastic material with an elevated resistance to knocks and scratches. Some models are accessible in a wide range of colours, as well as the traditional bright white. They are available in three different versions: close-coupled; medium to low position and high position.

OLI exposed cisterns are equipped with a fast and silent float valve with different water connection possibilities. Close-coupled version (fitted directly onto the ceramic pan) is ideal for the replacement of ceramic cisterns.

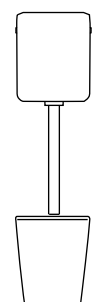

Close-coupled

Directly on the pan

Medium-low position

Directly on the wall

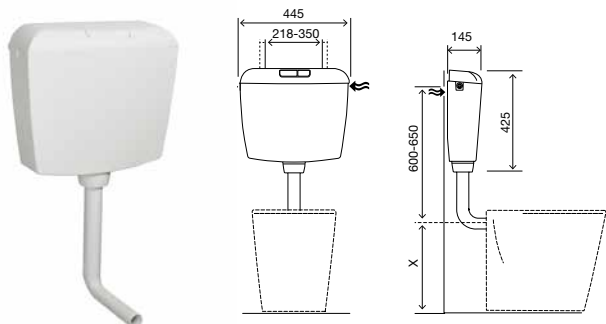

High position

Directly on the wall complemented
by a lever/puller

QUARZO

Medium-low Position

- Dual flush 6/3 litres (adjustable to 9/4 litres in the outlet valve);
- Medium/low level installation;
- Acoustic and anti-condensation internal lining;
- Silent inlet valve (NF Class I);
- 145mm thick;
- Adjustable wall fixation system;
- Water supply connections - Three positions*;
- Other versions compliant with: EN 14055 CL1 class "A" for the Water Efficiency in compliance with the ANQIP Authority requirements;
- White PS material;
- 5 year warranty.

CÓD DESCRIPTION

124427 ○ QUARZO

154961 ○ QUARZO OLIpure

Included

- Flush pipe Ø50/40;
- Wall fixation accessories;
- WC pan connection rubber seal.

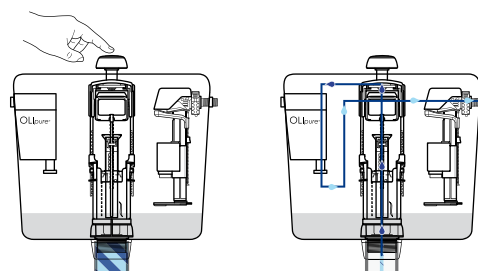

OLIpure the right solution for a perfect hygiene in the bathroom.

Internal system that pumps cleaning liquid in each flush. This way the cleaning liquid is always in a closed circuit, unlike traditional cleaning tablets that are always in contact with water, causing possible damages in the cisterns components.

- Easy, fast and simple refilling of the cleaning liquid, through a small opening on the side of the cistern.

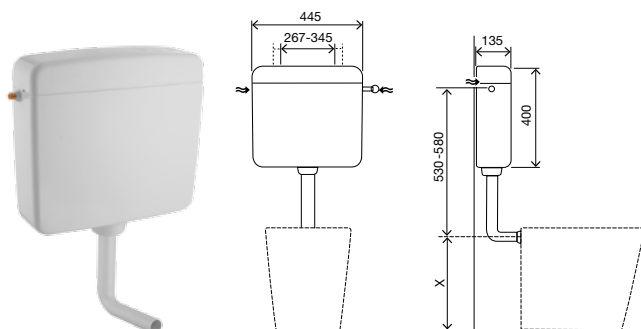

- Universal - Compatible with every WC liquid cleaning product;
- Long lasting, 450ml maximum capacity.

* For the water connection to the back position, a bended connection pipe or flexible hose it's needed

TOPAZIO DD

Medium-low Position

- Dual flush 6/3 litres (adjustable to 9/4 litres in the outlet valve);
- Medium/low level installation;
- Acoustic and anti-condensation internal lining;
- Silent inlet valve (NF Class I);
- 135mm thick;
- Adjustable wall fixation system;
- Water supply connections - Three positions;*;
- Other versions compliant with: KIWA;
- EN 14055 CL1;
- Class "A" for Water Efficiency in compliance with the ANQIP Authority requirements;
- White PS material;
- 5 year warranty.

NOTE. Different colors available upon request.

Included

- Flush pipe Ø50/40;
- Wall fixation accessories;
- WC pan connection rubber seal.

CÓD	DESCRIPTION
416201	TOPAZIO DD with 1/2" stop valve
416501	TOPAZIO DD

ONIX PLUS

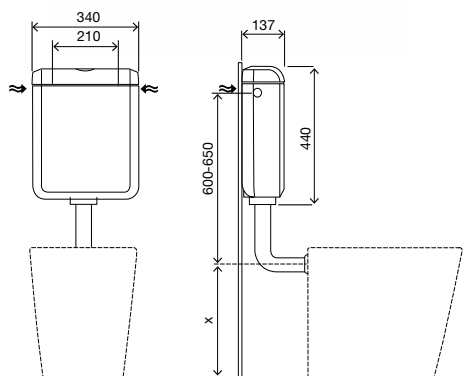

Medium-low application or close couple application

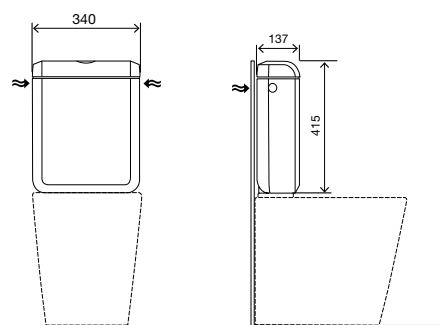

- Dual flush 6/3 litres (adjustable to 4/2 litres in the outlet valve);
- Medium/low level installation or close couple;
- Acoustic and anti-condensation internal lining;
- Delayed refilling - Azor plus inlet valve;
- Silent inlet valve (NF Class I);
- 137mm thick;
- Water supply connections - Three positions;*;
- Other versions compliant with: KIWA;
- EN 14055 CL1;
- Class "A" for Water Efficiency in compliance with the ANQIP Authority requirements;
- White PS material;
- 5 year warranty.

Included

- Close-couple fixation kit for close couple installation;
- Flush pipe Ø50/40 for medium-low level installation;
- Wall fixation accessories;
- WC pan connection rubber seal.

Medium-low application

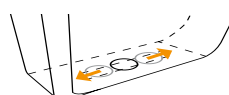

Close couple application

SAVES UP TO 9L OF WATER PER DAY

CÓD	DESCRIPTION
340221	ONIX PLUS 2 in 1

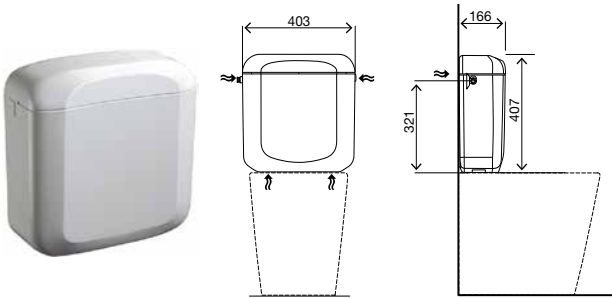

The cistern application allows an easy adjustment. Other versions compliant with: the WC pan fixation holes

* For the water connection to the back position, a bended connection pipe or flexible hose it's needed

ZAFFIRO DD

Close-coupled

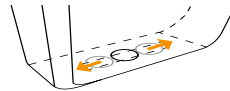

- Dual flush 6/3 litres (adjustable to 9/4 litres in the outlet valve);
- Close couple installation;
- Acoustic and anti-condensation internal lining;
- Silent inlet valve (NF Class I);
- 166mm thick;
- Water supply connections - Three positions;*
- Other versions compliant with: KIWA;
- EN 14055 CL1;
- Class "A" for Water Efficiency in compliance with the
- ANQIP Authority requirements;
- White PS material;
- 5 year warranty.

Included

- Close-couple fixation kit.

NOTE. Different colors available upon request.

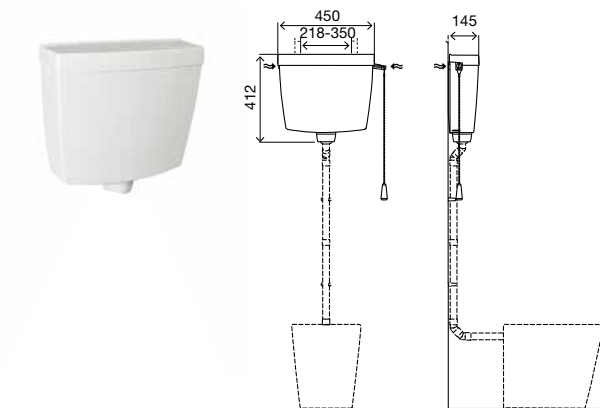

The cistern application allows an easy adjustment Other versions compliant with: the WC pan fixation holes

CÓD	DESCRIPTION

SMERALDO

high position

CÓD	DESCRIPTION
027870	○SMERALDO high position

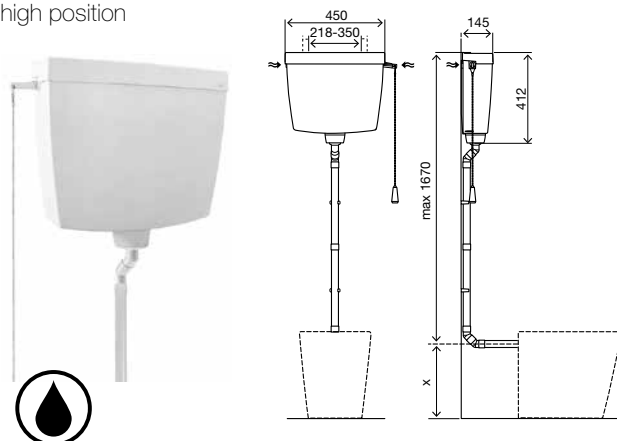

- High level exposed tank with single flush 6 litres (adjustable to 9 litres in the inlet valve);
- Actuation in the push button (frontal) or pulling a chain;
- High/Medium/low level installation;
- Silent inlet valve (NF Class I);
- 145mm thick;
- Adjustable wall fixation system;
- Water supply connections - Three positions;*
- bEN 14055 CL1;
- White PS material;
- 5 year warranty.

Included

- Chain for high level installation;
- 4 modular flush pipes Ø32;
- Wall fixation accessories;
- WC pan connection rubber seal Ø32.

OLISTYLE

high position

CÓD	DESCRIPTION
440141	○OLISTYLE

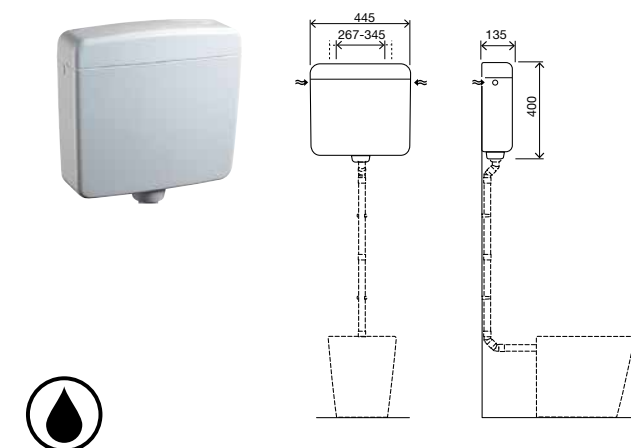

- High level exposed tank with single flush 9 litres (adjustable to 6 litres in the inlet valve);
- Actuation in the push button or pulling a chain;
- High/Medium/low level installation;
- 145mm thick;
- Adjustable wall fixation system;
- Water supply connections - Three positions;*
- EN 14055 CL1;
- White PS material;
- 5 year warranty.

Included

- Chain for high level installation;
- 4 modular flush pipes Ø32;
- Wall fixation accessories;
- WC pan connection rubber seal Ø32.

TOPAZIO

high position

CÓD	DESCRIPTION
413781	○TOPAZIO Pneu high with 1/2" stop valve

- High level exposed tank with single flush 9 litres (adjustable to 6 litres in the inlet valve);
- Actuation in the Lid push button or pneumatic button (pneumatic push buttons Page 119);
- High/Medium/low level installation;
- Acoustic and anti-condensation internal lining;
- Silent inlet valve (NF Class I);
- 135mm thick;
- Adjustable wall fixation system;
- Water supply connections - Three positions;*
- EN 14055 CL1;
- White PS material;
- 5 year warranty.

Included

- Wall fixation accessories.

* For the water connection to the back position, a bended connection pipe or flexible hose it's needed

UNIVERSAL MECHANISMS

Universal inlet and outlet
valves for ceramic cisterns

Easy and quick installation

OLI is a leading European producer of mechanisms for ceramic cisterns and its quality is recognized by the most important international bodies. The extremely silent inlet valves and the elevated performance levels of our outlet valves are tested under strict laboratory conditions before being introduced to the market.

OLI mechanisms are also available in "blister" packs and are the best solution for consumer self-service areas.

Designed with the final consumer in mind, the product is easy to identify.

Inlet valve

- Side, left and right, or bottom water supply;
- Silent;
- Delayed refill saves up to 9 litres of water per day.

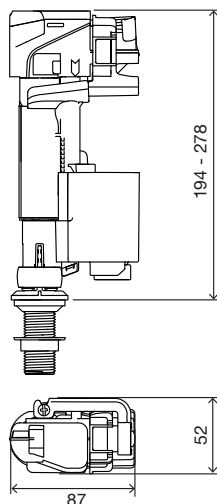

Outlet valve

- Single or dual flush;
- Different actuation systems;
- Top or frontal application, pull or push for different models.

IVC 102 PLUS

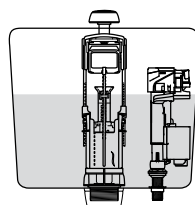

Inlet valve

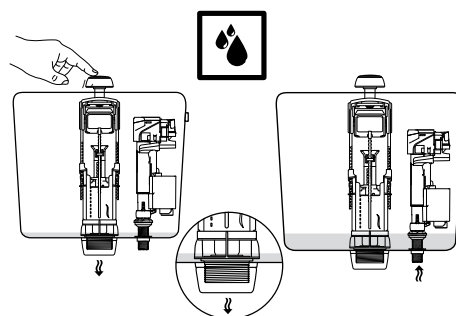

SAVES UP TO **9L**
OF WATER PER DAY

- Delayed refilling inlet vale: it starts after the outlet valve is in the close position;
- Bottom inlet valve with ½" brass (also available in plastic) or 15/16 in plastic connection;
- Height is adjustable;
- Easy to install;
- Easy maintenance;
- Silent inlet valve;
- Integrated filter can be cleaned;
- Reduced dimensions;
- Counter pressure closing system (hydraulic);
- Dynamic pressure functioning range: 0.5-6bar;
- Maximum static pressure: 16bar;
- Anti-backflow function;
- Quick filling;
- 10 year warranty.

OPERATION MODE
DUAL FLUSH

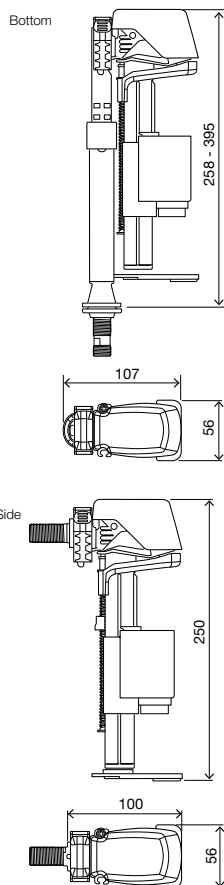

CÓD DESCRIPTION

878736	IVC 102 PLUS 1/2 brass - box
878735	IVC 102 PLUS 15/16 plastic - box
879284	IVC 102 PLUS ½ plastic - box
878738	IVC 102 PLUS 1/2 brass - bag
878737	IVC 102 PLUS 15/16 plastic - bag
879285	IVC 102 PLUS ½ plastic- bag

The IVC102 inlet valve, with his delayed opening system, only opens the water after the flush valve closes. This system allows a water saving up to 0.5 liters in average in each full flush, resulting in a daily average saving of 9 liters.

AZOR PLUS

Inlet valve

SAVES UP TO **9L**
OF WATER PER DAY

- Delayed refilling inlet valve: it starts after the outlet valve is in the closed position;
- Side and bottom water supply connection;
- Adjustable height in the bottom connection;
- Easy to install;
- Reduced dimensions;
- Side and bottom inlet valve, with 3/8" brass connection (also available in plastic or 1/2" plastic or brass);
- Counter pressure closing system (Hydraulic);
- Dynamic pressure functioning range: 0.1 – 14 bar;
- Maximum static pressure: 20 bar;
- Silent valve, NF class I certified;
- Easy maintenance without the need to disconnect from the water connection;
- Anti-Backflow function;
- Other versions compliant with: WRAS (bottom/side version), NF, KIWA and DVGW, UPC (side version);
- 10 year warranty.

ATLAS CABLE

Outlet Valve

- Dual flush outlet valve with adjustable half and complete water flush volume;
- Universal and flexible application (front, top or side push button position);
- Cable actuation < 20 N;
- High flow rate flush;
- Damping system - silent operation;
- Adjustable telescopic overflow pipe;
- Easy installation and maintenance (bayonet system);
- Silicone seal;
- Other versions compliant with: NF;
- 10 year warranty.

Included

- Ceramic cistern fixation system to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Self-adjustable chrome push button with rosette for cisterns with lid holes from Ø16 to Ø60mm.

CÓD	DESCRIPTION
501120	ATLAS CABLE - box
022369	ATLAS CABLE - bag

EASY ADJUSTMENT OF THE OVERFLOW PIPE

Universal adjustment Other versions compliant with: the desired water level in different ceramic tanks with a telescopic overflow pipe.

EASY ADJUSTMENT OF THE FLUSH VOLUME

Residual adjustment of the complete flush

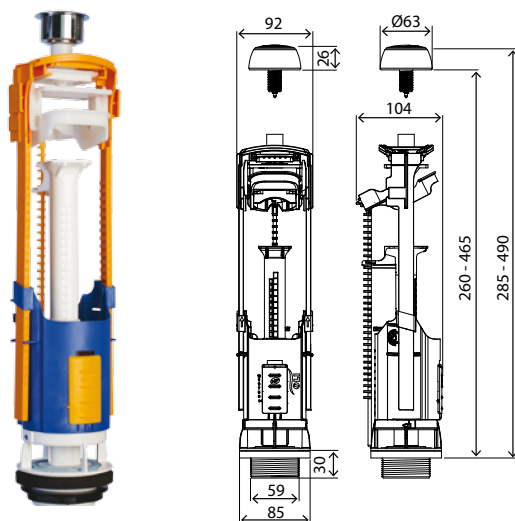

Slide the residual adjustment lever up and reduce the volume of the flush.

Residual adjustment of the half flush

Atlas allows you to adjust the half flush volume separately.

ATLAS

- Dual flush outlet valve with adjustable half and complete water flush volume;
- Universal top push button position that locks the ceramic lid;
- Allows the decentralization of the button on the ceramic lid (25mm on each axis);
- Mechanical actuation <20N;
- High flow rate flush;
- Damping system - silent operation;
- Adjustable telescopic overflow pipe and adjustable lever height;
- Easy maintenance (bayonet system);
- Silicone seal;
- Other versions compliant with: NF, WRAS, SAI, CQC and SIRIM;
- 10 year warranty.

Included

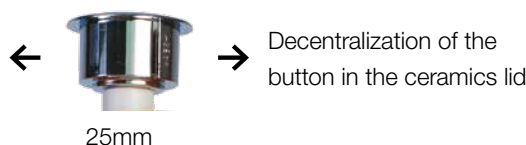

- Ceramic cistern fixation system to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Self-adjustable chrome push button with rosette for cisterns with lid holes from Ø16 to Ø60mm.

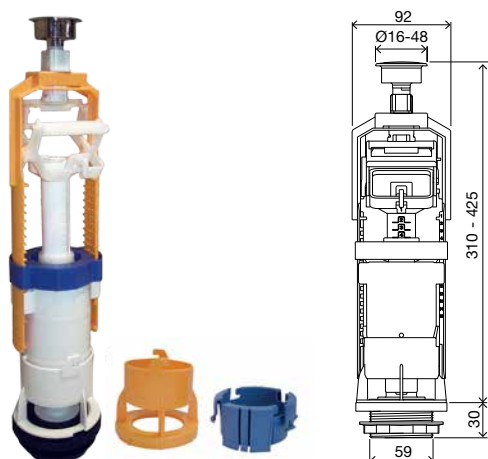

CÓD DESCRIPTION

501121 ATLAS - box

011967 ATLAS - bag

FAST START/STOP

- Single flush outlet valve with start/stop system;
- Universal top push button position that locks the ceramic lid;
- Allows the decentralization of the button on the ceramic lid (20mm on one axis);
- Mechanical actuation <20N;
- High flow rate flush;
- Adjustable telescopic overflow pipe and adjustable lever height;
- Easy installation and maintenance (bayonet system);
- EPDM seal;
- 10 year warranty.

Included

- Ceramic cistern fixation system to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Self-adjustable chrome push button with rosette for cisterns with lid holes from Ø16 to Ø40mm;
- 2 adaptors.

WARRANTY TERMS

1. WARRANTY PERIODS for OLI products:

- a. In-wall flushing cisterns, bidet, washbasin and urinal structures - 10 (ten) years;
- b. Exposed flushing cisterns- 5 (five) years;
- c. Flushing mechanisms (taps and valves) – 10 (ten) years;
- d. Electronic components, fixtures, and fast-wearing parts, specifically rubber seals or similar products, push-buttons and control plates – 2 (two) years;
- e. All other products – 2 (two) years;

2. The warranty period starts on the purchase date by the first final Consumer. The sales document, corroborating the sales date of the OLI product and the respective serial number, certifies the start date of the warranty. In the event of a subsequent purchase, or any alteration in proprietorship or user, the warranty period shall continue for the remainder the warranty period and shall continue unaltered relative to all other aspects of the warranty.

3. This warranty is also applicable to subsequent substitution parts for those determined to be defective until the end of the warranty period for the product of which they are a part, or up to two years after their application if the remaining warranty period for the product is less than two years. The repair or substitution of a product or a part does not renew the initial warranty period.

4. This warranty is only valid if the product has been correctly installed, in accordance with the installation instructions and the information contained in the catalogues and manuals provided by OLI. In situations where information is not covered in the aforementioned resources, installation should be carried out in accordance with the standards, rules and technical specifications contained in the legislation in effect, applicable to the type of devices and mechanisms in question.

5. The applicability of this warranty also depends on the use considered to be normal for the products, the operating conditions (ex. pressure, temperature, etc.) and the type of liquid used, which should have values within the parameters indicated in the catalogues or manuals provided by OLI.

6. The flush pipes are used for other liquids other than network water. Therefore, the standards relative to the resistance of polyethylene (PE), polypropylene (PP) and polyvinyl chloride (PVC) should always be respected.

7. Products with missing parts or which are defective at the time of installation, as well as during pressure tests, should not be used.

8. OLI products should not be used with other products which do not have local national Quality Approvals/Certificates.

9. Any product return should be accompanied by a copy of the sales receipt, with the product in its original packaging, whenever possible.

10. This warranty is immediately terminated and is not extended to any equipment or part that has been damaged or become inoperative as a result of the following:

- a) Accident, fall, fire, flooding and inappropriate, abusive or negligent use;
- b) Use of parts or accessories which have not been manufactured or provided by OLI, or whose provision and/or manufacture have not been expressly authorised by OLI;
- c) Unauthorised alterations to the equipment;
- d) Breaking of any warranty seal or removal of any label with the serial number or legally mandatory marking;
- e) Assistance, repairs or substitutions carried out by third parties other than OLI, an authorised reseller or certified technical centre.

11. Under no circumstances does the warranty cover the product's installation.

12. The products are packaged in duly identified packages which fulfil the requirements established in applicable national legislation. OLI cannot be held responsible for material or personal damage resulting from the incorrect or inappropriate use of the packages.

13. Failure to comply with any of the aforementioned clauses releases OLI from responsibilities pertaining to material damage and/or non-material damage which may result.

14. OLI recommends that the packaging materials of its products, after no longer being needed, should be recycled by the appropriate and socially responsible means and processes.

15. In the case of defects or non-conformity of OLI products, a written notification should be sent to the sales representative or OLI client manager within 60 days of becoming aware of the defect, as long as it was not previously visible, within reason. The appropriate measure shall then be taken to determine the possible defects detected. The notification may also occur by telephone, followed by a registered letter with acknowledgment of receipt within 24 hours to Customer Service, OLI – Sistemas Sanitários, S.A., Travessa do Milão, Esgueira, 3800-314 Aveiro (Portugal)

16.Failure to comply with the terms of the aforementioned number may result in the total or partial loss of the right to compensation or of the warranty itself.

17.The notification mentioned in Point 15 of this Warranty, issued by means of registered letter to OLI's Customer Service should contain the following information:

- a) Name, address and telephone number of the claimant;
- b) Identification of the product;
- c) Entity and place where the product was acquired (when not at OLI), as well as the respective purchase date;
- d) Address of the location where the product was installed;
- e) Description of the visible losses;
- f) Type of installation and the materials used (if the claimant has this information);
- g) Conditions of use, ex. type of system, pressure, temperature, etc. (if the claimant has this information);
- h) Name, address and telephone number of the company or person who installed the product.

18.Any personal information provided shall be used solely for processing the claim and for contact with the claimant and may be transmitted to the insurance provider to which civil responsibility for damages has been transferred.

19.Any obligation to repair, substitute, reduce the price or reimburse, if this should be the case, shall occur only for OLI products which have a visible marking or identifying logotype, with defects or non-conformities which have been proved through extensive technical verification. If it is concluded that the product is not defective, the expenses paid by OLI shall be invoiced to the claimant. The product's technical standards at the time of its manufacture shall be the basis for its conformity assessment.

20.OLI cannot be directly held responsible by the purchaser if the product's non-conformity results from actions by the resellers (or other commercial agents) of OLI products, namely when non-conformity results from statements made by the sales representative regarding the product, its qualities and use conditions, which are different from the product's indications and instructions, including the information contained in manuals and instruction guides provided with the products or published on the company's website.

21.The consumer's rights and obligations are established in the Legal Regime for the Sale and Warranty of Consumer Goods (Law-Decree No 67/2003, of 8th April, and its subsequent alterations, specifically those foreseen by Law-Decree No 84/2008, of 21st May), as well as the Consumer Protection Act (Law No 24/96, of 31st July).

22.Any litigation resulting from the terms or interpretation of the present warranty, or of the purchase and sales contract from which the warranty results, is regulated by Portuguese law and resolved in the court of the competent legal jurisdiction where the headquarters of the warranty provider, OLI, are located, with express waiver of any other, except in cases where OLI and the beneficiary of the warranty have agreed to settle the litigation in an arbitration court.

23.This warranty binds OLI according to its exact terms, except typographical errors.

Inspired by water...

For decades, OLI has been developing and producing sanitary installation systems aimed at innovation. The dual flush cistern and the inlet valve were two major inventions. Currently, OLI is a worldwide reference. It has over 40 active patents in Europe resulting from a continuous investment in Research and Development, guided by the constant challenge of water sustainability. Its know-how is acknowledged by its means and technologically advanced resources and the partnerships established with universities and research centres. In its factory in Aveiro, OLI controls the value chain: there, the idea emerges, the mould is produced, production takes place and the product is marketed in over 80 markets throughout the five continents. The rising importance of contemporary design and of the incorporation of new technologies and materials, clearly shown in the solutions presented in this catalogue, reaffirm OLI as a brand of excellence
