Atmosfere morbide, avvolgenti e ovattate.

È qui che i prodotti Aquaforte si calano e diventano protagonisti di atmosfere metafisiche.

La morbidezza della materia e della luce che disegna ambienti essenziali e fluidi è la stessa in cui ci ritroviamo immersi percorrendo gli spazi dell'architettura palladiana. Un dialogo intimo tra linee curve ed elementi plastici, un susseguirsi di colonne, un sovrapporsi di archi dove la luce entra ed esce disegnando scenografie coinvolgenti.

In questo palcoscenico vengono presentati i prodotti Aquaforte. Elementi plastici liberi nello spazio e che dello spazio fanno parte.

Soft, cocooning, muted atmospheres.

Enter Aquaforte products, which play a leading role in creating metaphysical atmospheres.

The softness of the materials and light that design minimalist, fluid environments is the same we find when strolling through Palladian architecture. An intimate dialogue between curved lines and sculptural elements, a row of columns, superimposed arches where light shines through, creating captivating scenarios.

Aquaforte products, free-standing and integrated sculptural elements, are presented against this backdrop.

Green solutions

I nostri sono prodotti ecosostenibili. Il solid surface ha origine da resine ricavate dal mais mentre il mineralmarmo che impieghiamo è creato con PET riciclato. Entrambi i materiali sono totalmente riciclabili a fine vita e il loro impatto sull'ambiente è minimo. Rispetto ai materiali alternativi che necessitano cotture ad altissime temperature, per i nostri materiali prodotti in assenza di cottura l'incidenza sul consumo di CO₂ generato è di gran lunga inferiore; e a questo si somma l'uso di un packaging che utilizza solo materiali provenienti da fonti rinnovabili e totalmente riciclabili. Anche il nostro processo produttivo è green perché utilizziamo energia pulita, sfruttando impianti fotovoltaici, riutilizzando l'aria calda e riciclando gran parte degli scarti di lavorazione.

Mineralmarmo

Il nostro mineralmarmo è un composito minerale creato con polveri di carbonato di calcio delle Dolomiti italiane e resina a base di PET riciclato, ed è simile alla pietra naturale quando è proposto con finitura opaca, ed è presente in tante colorazioni di tendenza. Questo straordinario materiale garantisce grande resistenza anche con spessori ridotti e permette di realizzare piatti doccia di grandi dimensioni. Il mineralmarmo è rivestito da un film di smalto di nuova generazione, che lo rende estremamente resistente ai graffi e ai sistemi di sanificazione a vapore.

Solid surface

Il solid surface è un materiale esclusivo che conferisce ai prodotti una bellezza naturale, un effetto pietra levigata "soft touch" che gli dona una piacevole sensazione al tatto, di grande eleganza. Il solid surface è un materiale non solo bello, ma anche molto performante, resistente all'ingiallimento e agli shock termici, ripristinabile e capace di ridurre il riverbero del rumore dell'acqua. Un prodotto esclusivo, che permette di creare vasche e lavabi monoblocco e viene realizzato con resine naturali di origine vegetale.

Certificazioni / marchi

I prodotti Aquaforte sono riconosciuti e certificati a livello internazionale. Tutti hanno la marcatura CE che si rifà al Regolamento Europeo 305/2011 per i prodotti da costruzione, inoltre hanno certificazione verde Environmental Claim Validation, che ne attesta l'ecosostenibilità, certificazione GreenGuard, per la salute e la sicurezza delle persone e certificazione internazionale C-UPC per il mercato americano.

Le nostre certificazioni:

UNI EN ISO 14516:2019 - 14527:2019 - 14688:2018
Dichiarazione di prestazione DoP GREENGUARD Gold
ECV – materia prima di origine vegetale
ECV – materia prima da fonti rinnovabili
C-UPC - International Association of Plumbing and Heating Machinery

Green solutions

Our products are environmentally sustainable. Solid Surface is manufactured from resins derived from maize while the Mineralmarble we use is made from recycled PET. Both materials are completely recyclable at the end of their life and have a minimal impact on the environment. Compared with alternative materials, which require firing at extremely high temperatures, our materials, manufactured without firing, generate a far lower consumption of CO₂; in addition, we use only packaging made from materials from renewable sources and that are completely recyclable. Our manufacturing process is also green as we only use clean energy from photovoltaic systems and re-use the hot air generated by the compressors.

Mineralmarble

Our Mineralmarble is a mineral compound created from finely ground calcium carbonate from the Italian Dolomites and resin from recycled PET. Similar to natural stone when given a matte finish, it is highly polished with a mirror effect in the high gloss version, and is available in a wide range of trending colours. This outstanding material guarantees great resistance even when the thickness is reduced, thereby enabling large size shower trays to be produced. Mineralmarble is covered with a film of new-generation enamel, which makes it extremely resistant to scratching and steam sanitising systems.

Solid surface

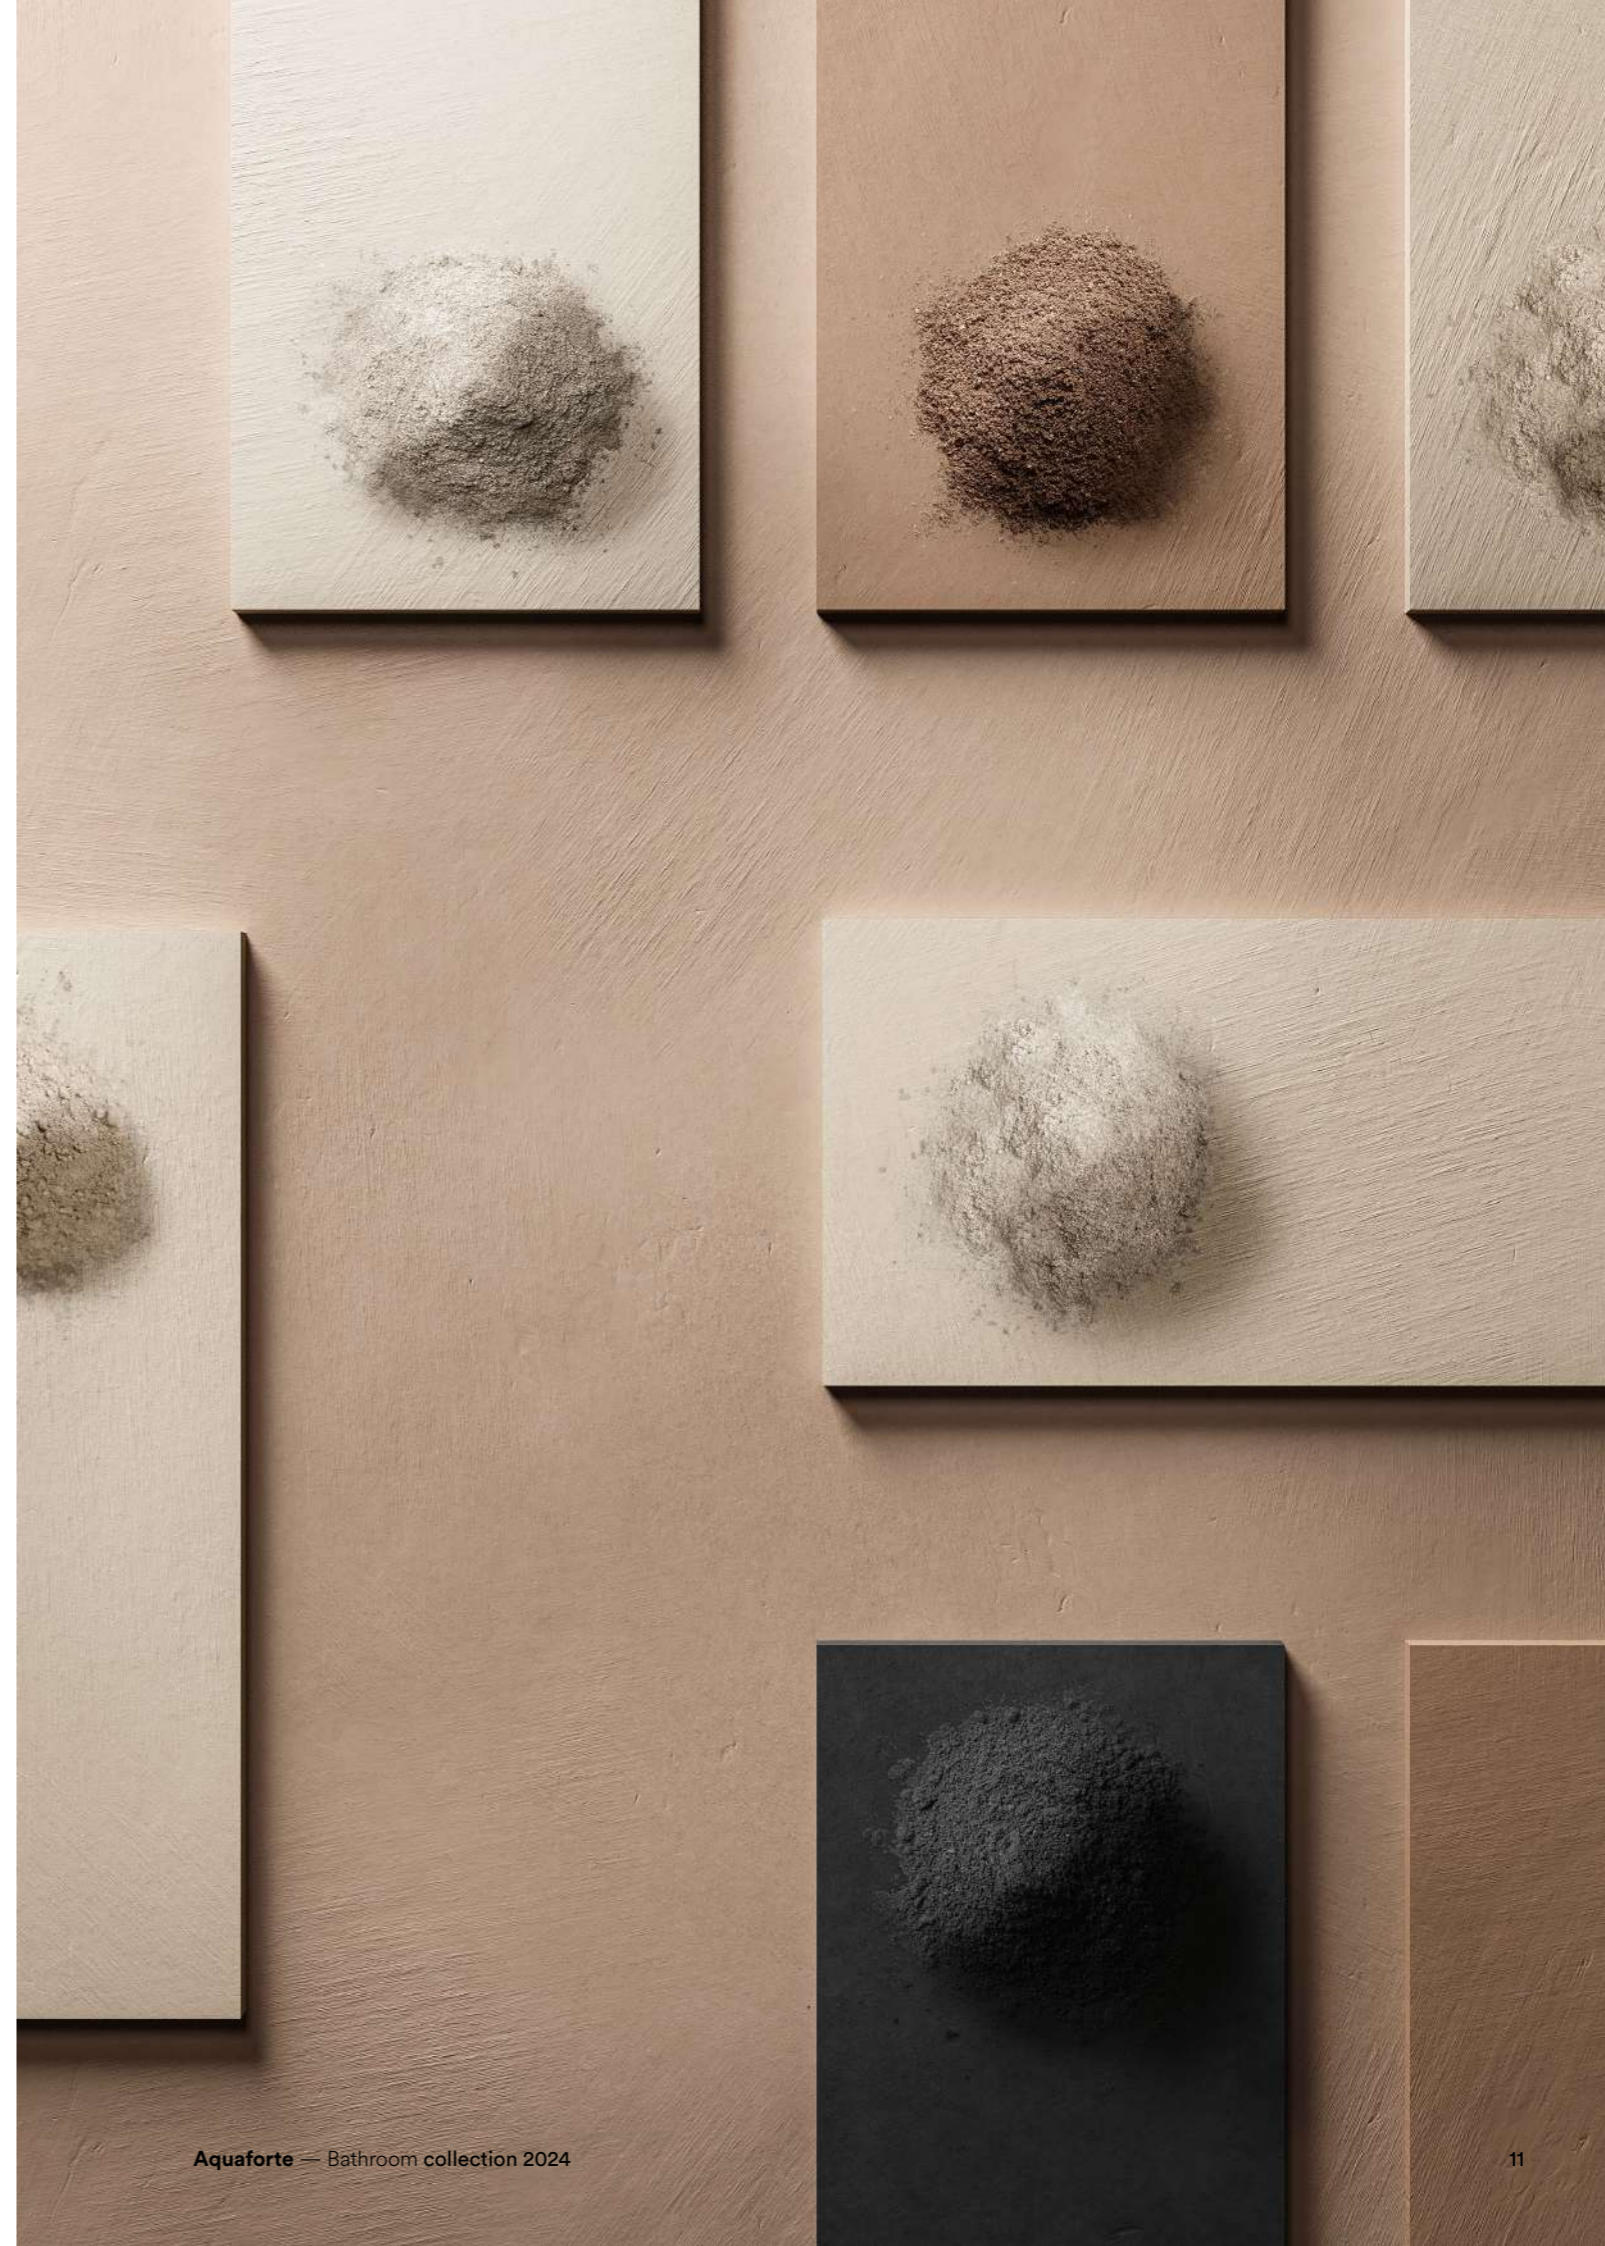

Solid Surface is an exclusive material that gives products a natural beauty, a "soft touch" polished stone effect with a pleasant sensation to the touch and outstanding elegance. Solid Surface is not just beautiful, it also performs extremely well, withstands yellowing and temperature shocks, can be repaired and is able to reduce the sound reverberation of water. This exclusive product, which can be used to create bathtubs and freestanding washbasins, is produced from natural, plant-sourced resins.

Certifications / trademarks

Aquaforte products are recognised and certified internationally. They all carry the CE mark, which is based on the European Regulation No. 305/2011 for construction products, and in addition have received Environmental Claim Validation green certification, which certifies their sustainability, GreenGuard certification for personal health and safety and C-UPC international certification for the American market.

Our certifications:

UNI EN ISO 14516:2019 - 14527:2019 - 14688:2018
Declaration of Performance GREENGUARD Gold
ECV – plant-based raw material
ECV – raw material from renewable sources
C-UPC - International Association of Plumbing and Heating Machinery

Il bagno come luogo dove vivere il Benessere assoluto, in un rituale sospeso nel tempo e nello spazio. Questa collezione di vasche freestanding e a misura, è nata per regalare atmosfere suggestive, dove relax e intimità si accompagnano alle parole bellezza e design.

Le vasche Aquaforte sono realizzate in Solid Surface, e tutte esprimono grande qualità produttiva e design esclusivo, con un attento studio del colore e con finiture superficiali che ricordano al tatto la pietra naturale levigata.

The bathroom is a place where we can experience total wellbeing and create rituals suspended in time and space. This collection of freestanding and made-to-measure bathtubs was developed to create evocative atmospheres, where relaxation and intimacy go hand in hand with beauty and design.

Aquaforte bathtubs are made of Solid Surface, and all feature high quality manufacturing and exclusive design, along with carefully selected colours and surface finishes reminiscent of the touch of natural polished stone.

Linee essenziali e un ricercato studio della forma che incontra la luce per dar vita ad elementi d'arredo esclusivi. I lavabi Aquaforte trovano origine nel vero design, dove l'estetica abbraccia sempre la funzionalità. Qui la materia resta protagonista, priva di ogni futile accessorio, ed è all'origine della forma stessa. Le qualità del Solid Surface permettono di dar vita a forme inedite, colori pieni, grande flessibilità progettuale, il tutto racchiuso nella grande solidità strutturale, anche negli spessori più ridotti.

Minimalist lines and an in-depth study of how shape interacts with light as a means of creating exclusive furnishing elements. Aquaforte washbasins are rooted in true design, in which aesthetics always embraces functionality. The material reigns supreme, devoid of all trivial accessories, and plays a key role in the actual design. The qualities of Solid Surface enable highly unusual shapes and vibrant colours to be produced offering great flexibility in terms of design, all embodied within great structural solidity, even where thicknesses are reduced.

PIATTI DOCCIA SHOWER TRAYS

La linea di piatti doccia Aquaforte è stata creata con lo scopo di esaltare i sensi. Ogni dettaglio è disegnato per regalare armonia e integrare questo elemento in modo totalizzante nel design progettuale. L'impiego sapiente del Mineralmarmo permette di creare finiture superficiali che giocano con il senso del tatto e ricreano gli effetti della pietra, del cemento, del marmo. Qui la materia si plasma ai nostri desideri e si fa portatrice di stile, eleganza, carattere.

The Aquaforte line of shower trays was created with the aim of enhancing the senses. Every detail is designed to create harmony and integrate this element completely into the overall design. The skilful use of Mineralmarmo allows surface finishes to be created that play on the sense of touch and recreate the effects of stone, concrete and marble. The material is moulded to our desires and becomes a champion of style, elegance and character.
